Heat treatment and kiln drying certificate

This is to certify, that **Lapua Sawmill Ltd** is registered by Plant Health Unit of Finnish Food Safety Authority Evira with the following registration number: **FI-54766** and the production of the company is controlled by regular inspections by the Plant Health Unit.

The sawn wood is debarked and kiln dried to below 20% moisture content. This moisture content is reached by drying the timber through an appropriate time/temperature schedule for 130 – 150 hours. During the kiln dry (KD) process the temperature in the kiln is 65-70 °C. The sawn wood produced by Lapua Sawmill Ltd fulfils the requirement of the ISPM 15 standard (56°C/30 min).
